WORK EXPERIENCE

Internship – CRYPTO NATION

2022 Jan. - now

Crypto Nation is an innovative company that will soon bring out its solution, Hyperion Vision, a platform dedicated to the crypto-market analysis, trading, and portfolio tracking.

My main task is to develop a **CeFi & DeFi Portfolio Management App**:

- Centralized/ Decentralized Portfolio Tracking with detailed statistics
- Manual management, NFT compatible, Transaction history
- Indication of investment solutions

Internship - FM Logistic

2021 Apr. - Jul.

Intern in web development in a large supply chain company with more than a billion turnovers. Here is an outline of my tasks:

- The realization of a **web interface** allowing to compare the accounts of the company present in the active directory against Google ones.
- The creation of a **web interface** to facilitate the control of backups Commvault, which is a partner company providing company data backup software. I was responsible to make the data clearer more quickly, with several features such as sorting or specific search.

Traineeship - Epitech

Oct. 2017 (2 days) / Oct. 2018 (2 days)

- Project about developing an artificial intelligence to systematically win the game of noughts and crosses, in python language.
- Introduction to web security (encryption and passwords) on the "Root-me" platform in the form of challenges and challenges.
