IT Internship | 4 months

WORK EXPERIENCE

Internship - FM Logistic

2021 Apr. - Jul.

Intern in web development in a large supply chain company with more than a billion turnovers. Here is an outline of my tasks:

- The realization of a web interface allowing to compare the accounts of the company present in the active directory against Google ones.
- The creation of a web interface to facilitate the control of backups Commvault, which is a partner company providing company data backup software. I was responsible to make the data clearer more quickly, with several features such as sorting or specific search.

Traineeship - Epitech

Oct. 2017 (2 days) / Oct. 2018 (2 days)

- Project about developing an artificial intelligence to systematically win the game of noughts and crosses, in python language.

- Introduction to web security (encryption and passwords) on the "Root-me" platform in the form of challenges and challenges.
